Optional Lead Paragraph or summary:

Polarean Imaging plc (AIM:POLX) is a drug-device combination company operating in the high-resolution medical imaging space. Polarean develops equipment that enables existing MRI systems to achieve an improved level of pulmonary function imaging and specializes in the use of hyperpolarized Xenon gas (^{129}Xe) as an imaging agent to visualize ventilation. XENOVIEW™ (xenon Xe 129 hyperpolarized) for oral inhalation was approved by the Food and Drug Administration on Dec. 23, 2022.
