Dallas, Texas

dallas tx

# 2019 ROADMAP

for Medical Educators

## WELCOME

Welcome to the 2019 ATS International Conference in Dallas, TX. With over 15,000 attendees from more than 100 countries, ATS 2019 is one of the largest gatherings of pulmonary, critical care, and sleep medicine professionals in the world.

The Section on Medical Education has created this Roadmap for Educators to highlight events of particular interest for those of us for whom teaching, curriculum development, educational program leadership and educational research are major elements of our careers. We encourage you to attend these events, along with the many other sessions focused on the latest developments within your scientific or clinical areas of interest. Be sure to stop by the Center for Career Development, a space to relax and network with like-minded clinicians, where you can also find programming devoted to the interests of educators.

Recognizing the rapid growth of interest in medical education as a career pathway, the ATS established the Section on Medical Education just about 5 years ago. The Section has over 1800 members, and is a great way to network and collaborate with a community of professionals who share your aspirations and are navigating some of the same challenges you may face. If you want to get more involved with the ATS, come to our membership meeting on Tuesday May 21st at 4:30 PM in the Hyatt Regency Dallas - Cumberland ABC (Exhibition Level) to meet others with the same idea. In addition to the programming at the International Conference, the Section on Medical Education offers webinars and podcasts throughout the year, and supports a mentorship program, awards program, and many other career development opportunities. Contact one of us if you have ideas for a podcast, webinar, symposium, or other programming or projects related to training and education. Beyond this annual meeting, the ATS should be your new professional home for a career in medical, nursing, or science education.

Regardless of whether you get involved with the Section on Medical Education, or get involved with an ATS Assembly in your area of clinical interest, the important message is to get involved. The American Thoracic Society is a forum through which you can connect to leaders in our field from around the world, enriching your personal and professional satisfaction long after you have returned home from this fabulous annual meeting.

Welcome to ATS 2019!

W. Graham Carlos, MD, MSCR, ATSF  
Committee Member

Hank Fessler, MD  
Co-Chair, Section on Medical Education

<b>1:30 PM - 3:30 PM</b>		
CC6	CRITICAL CARE CLINICAL CORE CURRICULUM II	Room D163/D165/D170/D172 (Level 1), KBHCCD

## ATS 101: THE ATS AT A GLANCE

To make the ATS more accessible, the Members in Training and Transition Committee created this document, ATS 101. We hope this section will give you some ideas on how you can become more active within the organization.

### How does the ATS work?

The ATS is a member-driven organization, meaning that all decisions are effectively made by members. The day-to-day function of the ATS relies on a dedicated staff of more than 70 employees, who work in offices in New York and Washington, D.C. The Society's leadership is represented by an Executive Committee comprised of the executive director and five elected officers.

Each year, the Society's Nominating Committee selects two candidates from solicited nominations and then the membership votes for who should become the next Secretary-Treasurer. The election results are announced in the ATS News and other Society communications in April.

### Why should I get involved in the ATS?

As an ATS member, you can have a direct impact on pulmonary, critical care, and sleep medicine both nationally and internationally. Active members help the Society to develop statements and guidelines, create new educational programs, prioritize content for existing activities and guide the political voice of the ATS.

**ATS leaders are actively soliciting the voice of junior members, so the best time to get involved is now!**

### What are the Assemblies?

The 14 ATS Assemblies and three sections are at the heart of the Society's mission. Through these groups, ATS members review, analyze and disseminate the latest basic science, translational, and clinical information. To learn more about Assemblies please go to <http://www.thoracic.org/members/assemblies/>.

### What is an ATS Committee?

Committees are appointed groups that shape and carry out the ATS's many initiatives. The Society's president-elect appoints new committee members in the months preceding each International Conference. To learn more about committees and how to get involved please go to <http://www.thoracic.org/members/committees/index.php>.

### What is the Public Advisory Roundtable (PAR)?

In February 2001, former ATS president William J. Martin, II, MD, founded ATS PAR, the arm of the ATS that incorporates patient and family perspectives into the Society's activities. Today, ATS PAR comprises 15 member organizations that represent patients affected by respiratory diseases, critical illnesses, and sleep-related conditions. The group collaborates with the ATS to advance their shared educational, research, patient care and advocacy missions. To learn more please go to <http://www.thoracic.org/patients/par/index.php>.

### How can I be more involved during the International Conference?

International Conference programming, for the most part, is driven by ATS Assemblies. Each Assembly is allotted a specific number of slots for each type of session and its Program Committee ranks various submissions. A direct way to be a part of the conference is to submit your own symposium suggestion to the appropriate assembly during the "Call for Input" period, which takes place immediately after the conference. To increase the chances of acceptance, ask the assembly program committee chair and/or its members for advice.

Remember, you shouldn't be discouraged by rejection. Assemblies often receive many submissions for only a few symposia slots. Get feedback and try again. Persistence pays off!

### Where can I access CME?

The ATS is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The designation of AMA PRA Category 1 Credit(s)<sup>™</sup> per session will be available in January and in the Final Program. Physicians should only claim the credit commensurate with the extent of their participation in the activity. This live activity has been planned and implemented in accordance with the essential areas and policies of the ACCME and are free from the control of commercial interests. The ATS is unable to offer AMA PRA Category 1 Credit(s)<sup>™</sup> for sessions that include presentations made by industry-employed speakers if the topic of their presentation relates to a product or business line of their employer. Most of the major symposia, postgraduate courses, workshops and seminars are eligible for AMA PRA Category 1 Credit(s)<sup>™</sup>.

### How to claim Nursing Contact Hours Credit:

The American Thoracic Society is pleased to announce that it has partnered with National Jewish Health to provide Nursing Contact Hours for selected sessions. After you attend a session that has been selected for Nursing Contact Hours, you will complete an evaluation online or at a kiosk by logging in with your registration email and badge number. You will also be asked to provide your nursing license number. Nursing Contact Hour certificate are created upon completion of the evaluation. Certificates may be emailed and /or printed. For more information, go to <http://conference.thoracic.org/program/cme-nursing-ce.php>.

### Where can I go for more information for Trainees in the field?

The ATS International Conference is one of the largest gatherings for pulmonary, critical care and sleep medicine professionals in the world. For those starting their careers or have recently transitioned into a career in pulmonary, critical care or sleep, the International Conference is a great opportunity to learn more about the field. To learn more about programs for Trainee please go to <http://www.thoracic.org/members/membership/join-the-ats/special-membership-programs.php>

**If you are a trainee and are interested in getting involved in the ATS, send an email to: [fellows@thoracic.org](mailto:fellows@thoracic.org).**

## CENTER FOR CAREER DEVELOPMENT (CCD) SCHEDULE OF EVENTS

Sunday, May 19 –Tuesday, May 21, 2019

7:00 AM – 5:00 PM

Kay Bailey Hutchison Convention Center Dallas

Hall B (Level 2)

The Center for Career Development is a professional networking and career development forum for early career professionals (medical students, residents, fellows, post docs, other allied healthcare and research professionals) in training or transitioning from training in Pulmonary, Critical Care or Sleep Medicine. Each day, the CCD features informal workshops aimed at enhancing the professional development for all health care professionals. The sessions in the CCD are a unique and valuable opportunity for YOU to interact with experts in PCCM and have your questions answered about career development topics that are important to you!

*Complimentary Breakfast Everyday 7:00 AM*

Sunday, May 19, 2019	Monday, May 20, 2019	Tuesday, May 21, 2019
