

 **ATS 2025**

May 16-21  
San Francisco

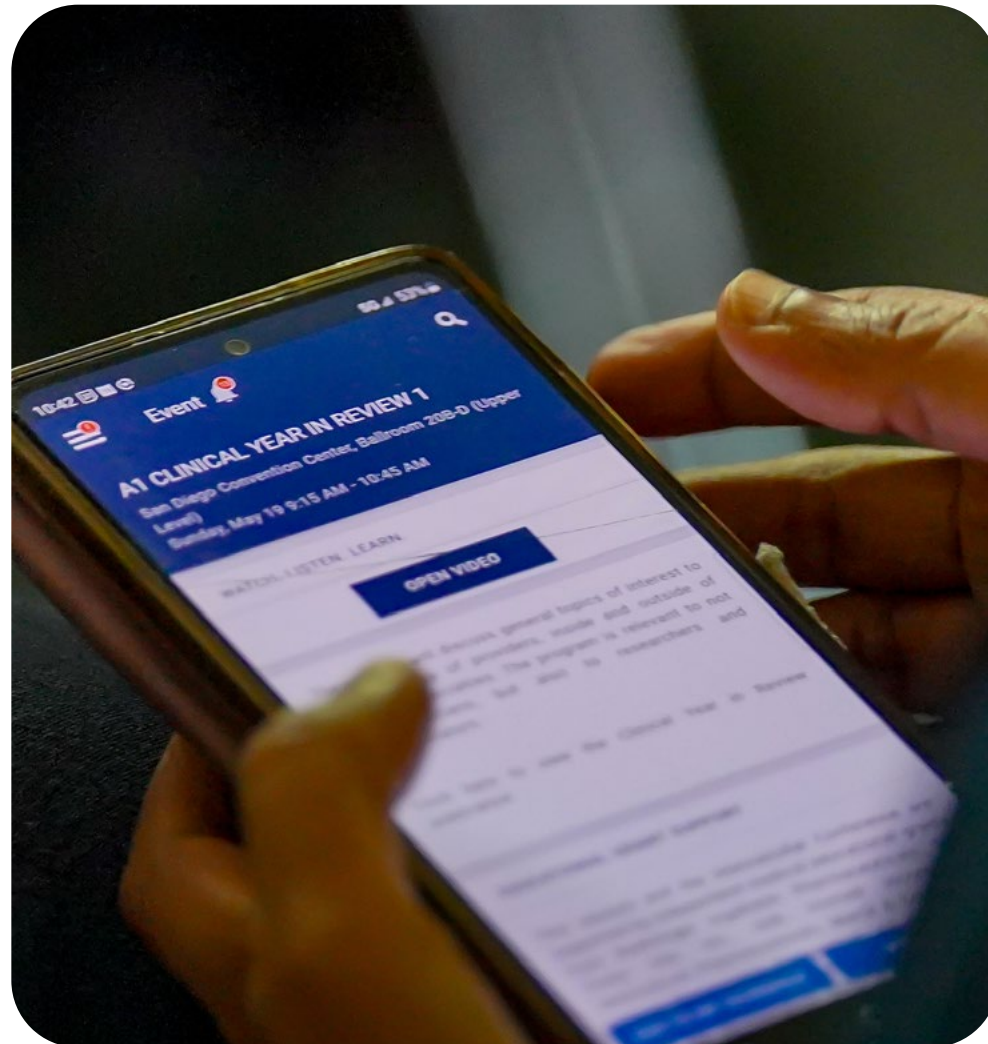

# Road Map for Medical Educators

**Welcome**

# Download the ATS 2025 App to Enhance Your Conference Experience

*Available in the App Store or Google Play to download starting late-April.*

For information at your fingertips, download the conference app from the App Store or Google Play. With this tool, you can build your itinerary, learn about special events, browse sessions and speakers, map your trip to the exhibit hall and receive important updates.

## Features include:

- Search - find the sessions you want by date, speaker, type, track and disease state and then build a personalized itinerary.
- Audience response - use the app to participate in session Q&A and provide us with your feedback through the app's session evaluations.
- Education - View the wide array of available educational opportunities – MOC, CME, Industry Supported Evening Symposia, Industry Theaters, and Guru Bars.
- Maps - Use the enhanced maps function to access interactive floorplans of the San Francisco Convention Center and surrounding headquarter hotels.
- Connect - Find other attendees and share your contact information. Its functions include identifying and messaging other attendees, as well as taking notes and compiling contact information of those you connect with.
- Scan a Badge - Easily exchange contact information by scanning colleagues' registration badges. Once scanned, their contact information will appear on your screen and can be stored on your device, saving you time and allowing you to continue the conversation long after the conference.

Together, these and other capabilities make the ATS 2025 conference app a must-have tool.
