BOOT
CAMP**

ATS·2015
Denver Colorado

We help the world breathe®
PULMONARY • CRITICAL CARE • SLEEP

The Program

PROGRAM OVERVIEW:

The 2015 Resident Boot Camp was a two-day course that addressed basic knowledge and skills needed for first-year fellows in adult or pediatric pulmonary and/or critical care medicine programs. The course focused on topics and procedures that internal medicine residents may have had little or some exposure to, but which are essential to success as a first-year fellow. The 2015 Boot Camp was attended by 140 in-coming fellows who had matched into a pulmonary or critical care fellowship program beginning July 2015 and featured over 85 faculty teachers!

The 2015 Boot Camp was supported by in-kind grants from Bryan Corporation, CareFusion Corporation, FUJIFILM SonoSite, Inc., Hamilton Medical, Inc., Micro Direct, Inc., Olympus Corporation of the Americas, ResMed, Richard Wolf Medical Instruments Corp., Teleflex Incorporated, University of Colorado Denver Department of Anesthesiology, and Verathon.

The Details

OBJECTIVES:

The ATS Resident Boot Camp was a two-day course for in-coming first-year adult and pediatric fellows, which includes large group lectures, small breakout sessions and skill-based workshops.

Participation in the ATS Resident Boot Camp allowed new fellows to:

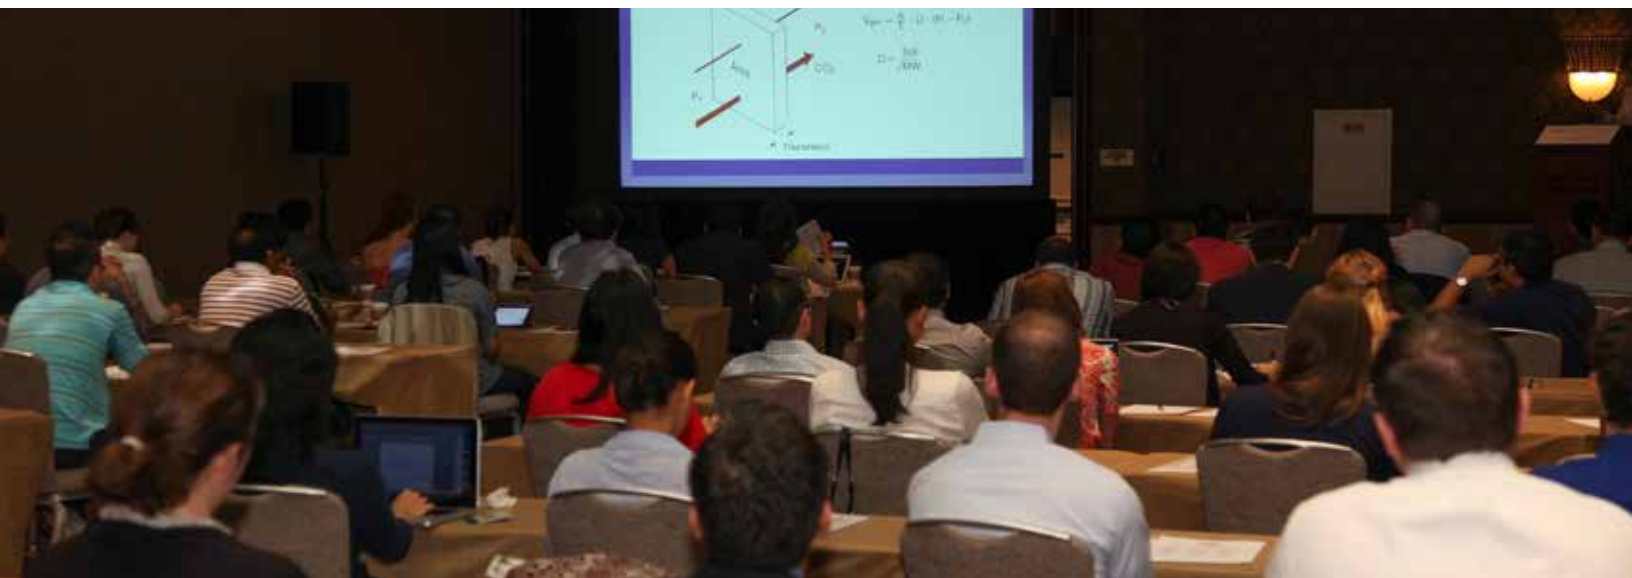

- Acquire knowledge of basic techniques and principles of mechanical ventilation, airway management, and bronchoscopy (indications, techniques, and limitations);
- Attain skills in vascular, thoracic, and pleural ultrasound image acquisition for ultrasound guided procedures and diagnosis (pneumothorax, thoracentesis, line placement, right ventricular dilation/dysfunction, volume status);
- Improve knowledge base in cardiopulmonary physiology; and
- Develop strategies to successfully manage common clinical emergencies encountered as a fellow.

OUTCOMES:

- 100% of participants ranked the content of the course as “excellent or good”.
- 100% of participants ranked adherence to course objectives as “excellent or good”.

QUICK FACTS

- 140 attendees attended Boot Camp
- 140 attendees received a travel stipend from the ATS to attend the Boot Camp
- Over 85 faculty teachers participated to maximize individualized attention and small-group learning

Faculty

The Boot Camp featured some of the best and brightest educators, and even included members of the ATS Executive Committee – demonstrating the Society’s commitment to developing the next generation of leaders in pulmonary, critical care and sleep medicine.

Agenda

Large Group Lectures

Welcome to the Resident Boot Camp
Physiology-Pulmonary
Physiology-Critical Care
Waveforms and Critical Care
Top Five ICU Emergencies
Inpatient Emergencies: How to Lead Codes and Rapid Responses
Top Five Pulmonary Consult Questions

Small Break-Out Sessions

How and When to Submit Abstracts Papers and Chapters
End-of-Life Discussions
How to Lead a Team
How to Choose a Mentor
How to Avoid Burnout in Fellowship (Maintaining Work/Life Balance)
How to Teach in Small Groups

Hands-On Workshops

Mechanical Ventilation
Bronchoscopy 101
Bronchoscopy for Hotshots
Spirometry: How to Read PFTs
Lung and Pleural Ultrasound
Cardiac Ultrasound and Volume Assessment
Airway Managements 101
Difficult Airway Management

“ATS Resident Boot Camp provided me with amazing experience to prepare me for fellowship. Being able to get hands-on experience during various workshops on ultrasound-guided procedures, airway management, reading PFT and performing bronchoscopy and EBUS prior to my fellowship was invaluable. I’m very thankful to the sponsors and teaching faculty for the opportunity.”

-2015 Boot Camper: James Chang, MD

Residency: Michigan State University

Fellowship: Case Western Reserve University

“I was very glad I had the chance to participate in the Boot Camp at the ATS meeting for residents who will start pulmonary and critical care fellowships. This gave me a very good introduction into pulmonary and critical care medicine. In particular, I enjoyed the workshops on bronchoscopy and using endobronchial ultrasound during bronchoscopic procedures. I also liked the didactic sessions on the most common problems in pulmonary medicine and critical care medicine. I think this program has helped me start my fellowship with more confidence.”

-2015 Boot Camper: Hawa Edriss, MD

Residency: Texas Tech University Health Science Center
Fellowship: Texas Tech University Health Science Center

“The Resident Boot Camp helped me in two major ways - allay my anxieties on the knowledge and skill-set prior to fellowship, convincing me that I can do this; and teaching me things where my abilities were not well developed, thereby making me well-rounded! Would recommend this very highly to all final-year residents seeking to enter Pulm/CC/Sleep fellowships.”

–2015 Boot Camper: Saraschandra Vallabhajosyula, MBBS

Residency: Creighton University School of Medicine

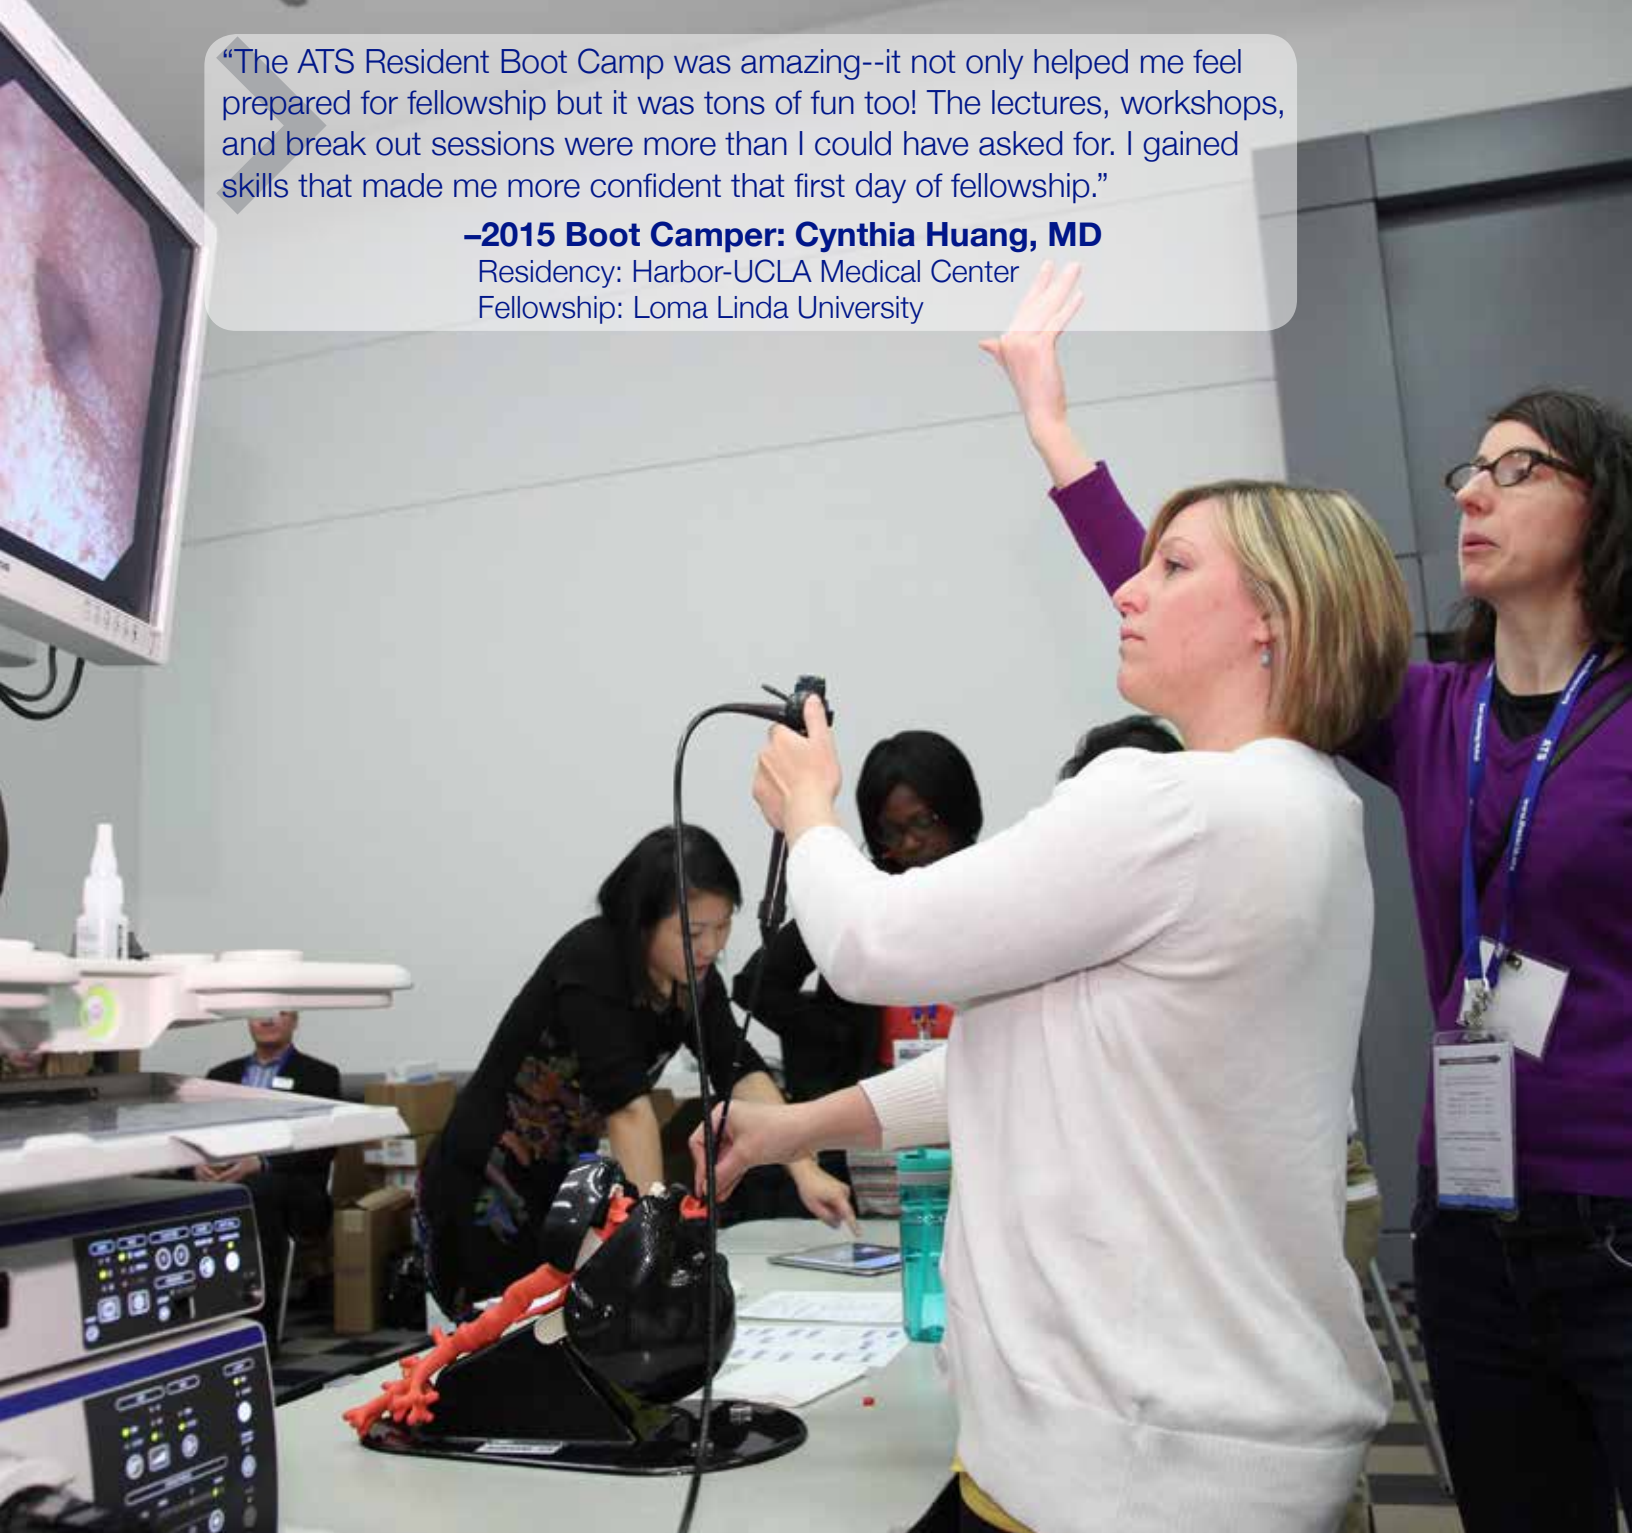

Fellowship: Mayo Clinic College of Medicine

“The ATS Resident Boot Camp was amazing--it not only helped me feel prepared for fellowship but it was tons of fun too! The lectures, workshops, and break out sessions were more than I could have asked for. I gained skills that made me more confident that first day of fellowship.”

–2015 Boot Camper: Cynthia Huang, MD

Residency: Harbor-UCLA Medical Center

Fellowship: Loma Linda University

“Thank you for the opportunity to be part of the Boot Camp. I really feel that it gave me a great foundation to start my training as a fellow. My co-fellow and I actually came back from the boot camp and told our program director that every first-year fellow should attend the boot camp prior to starting fellowship.”

–2015 Boot Camper: Felix Hernandez, MD

Residency: Cleveland Clinic Florida

Fellowship: Cleveland Clinic Florida
